DESCRIPTION OF WORK

This project consists of replacement of five (5) 480 volt Motor Control Centers (MCC) in the Allegan Street Parking Ramp at the Capital Complex in Lansing, Michigan. These MCCs mainly feed the ventilation system for the two level parking structure. Associated with this project is constructing two new electrical rooms within the parking structure's upper level to house three of the five MCCs that are being replaced. The remaining two MCCs will be replaced in their present location. Outages on these MCCs should be kept to a minimum, however all work is expected to be performed during normal working hours. This project also includes but is not limited to; new lighting, concrete and masonry work associated with new electrical rooms, with all in work to be completed in accordance with project specifications and drawings prepared by GRP Engineering, Inc.
